DETAILED ACTION

1. **Please Note:** In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Ph.D., Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-3, 12 and 13, drawn to a method of treatment using a CD1 blocking agent that is a glycolipid, classified in Class 514, subclass 23.

II. Claims 1-3, 12 and 13, drawn to a method of treatment using a CD1 blocking agent that is a phospholipid, classified in Class 514, subclass 52.

III. Claims 1,2, 4-10, 12 and 13, drawn to a method of treatment using a CD1 blocking agent that is an antibody, classified in Class 424, subclass 156.1.

IV. Claims 1, 2, 4 and 11-13, drawn to a method of treatment using a CD1 blocking agent that is a soluble CD1, classified in Class 514, subclass 2.

V. Claims 1, 2, 4 and 11-13, drawn to a method of treatment using a CD1 blocking agent that is a glycolipid bound to CD1, classified in Class 424, subclass 193.1.

VI. Claims 1, 2, 4 and 14, drawn to a method of treatment using a CD1 blocking agent that is a soluble TCR, classified in Class 514, subclass 8.

3. Inventions I, II, III, IV, V and VI are different methods of use.

These inventions require different ingredients, process steps and endpoints.

The agents used in the different methods are different biochemical molecules which differ in structure.

Therefore they are patentably distinct.

4. Because these inventions are distinct for the reasons given above and the search required for any group from Groups I-V is not required for any other group from Groups I-V and Groups I-V have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed Invention/Group III: wherein the antibody specificity is:

- A) against CD1d or
- B) against multiple CD1 isotypes

These species are distinct because their structures and modes of action are different.

6. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

9. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marianne DiBrino whose telephone number is (703) 308-0061. The examiner can normally be reached Monday through Friday from 8:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.
